

# Costal Cartilage

## A natural, biological solution

### Clinical Overview

Costal Cartilage is sterile (10<sup>-6</sup>) hyaline cartilage from the rib. Cleaned and sterilised using the patented Allowash XG® technology, this grafts biomechanical and biochemical properties are maintained, making it ideal for nasal and ear reconstruction

### Applications

- Nasal Reconstruction
- Ear Reconstruction

### Why Use

- **Sterile:** Sterilised using proprietary and patented Allowash XG® technology. This technology provides a sterility assurance level of 10<sup>-6</sup>, without compromising the grafts inherent properties
- **Supportive:** Provides biomechanical strength requirements for intended use
- **Convenient:** Allows physician to select appropriate graft for clinical procedure
- **Malleable:** Easy to trim and shape to perfectly fit surgical need
