

Cryopreserved Skin

Why Hospital Innovations?

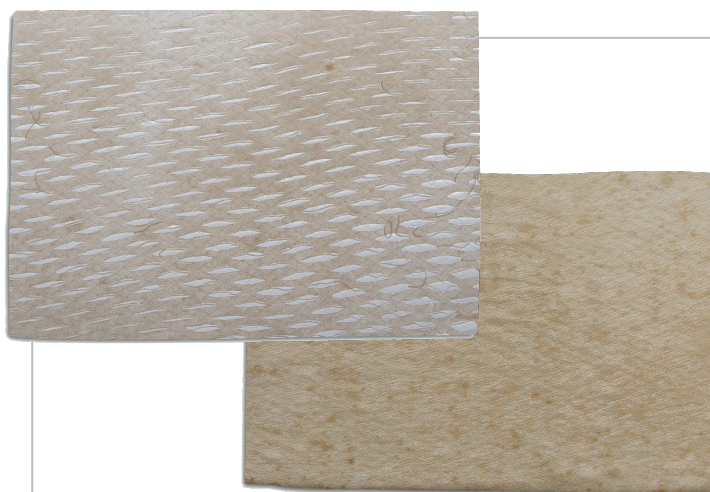

Hospital Innovations has been driven by the need to give surgeons the most innovative, clinically proven and cost effective products available. With an extensive product range, we have grown to become the largest private human tissue bank in the UK as well as the UK's leading provider of orthobiologics.

Our advanced Wound Care Portfolio extends our tissue portfolio to include skin allograft for the treatment of burns. Composed of living cells, fibroblasts and keratinocytes with a fully developed extracellular matrix (ECM) it serves as a barrier against environmental particulate, bacterial contaminants and against loss of body fluids.

£6 million+
savings to
the NHS

since 2011, thanks to
our innovative allograft
return service

Key Features

Meshed

- Saves time in theatre;
