

# MatriGRAFT®

## Femoral Heads & Humeral Head

### Clinical Overview

Femoral and humeral heads, designed to provide immediate structural support to restore segmental bone loss or to be ground into cortical/cancellous chips

### Applications

- Joint Arthroplasty
- Fracture Management
- Creating Custom Wedges or Segments
- Filling Osseous Defects

### Why Use

- **Osteoconductive:** Natural bone matrix facilitates cell attachment and proliferation, and vascular in-growth
- **Structural:** Cortical wall provides immediate structural support
- **100% Human Bone:** Can remodel with a patient's own tissue during the healing process
- **Sterile:** Sterilized using patented and proprietary Allowash XG® technology which provides a sterility assurance level (SAL) of  $10^{-6}$ , without compromising the graft's inherent osteoconductive properties<sup>1</sup>
- **Convenient:** Implant is pre-sized to fit a variety of applications and minimize prep time in the operating room
