

PROVEN Sterilisation  
without Irradiation

# Achilles Tendons

Achilles tendons allow for multiple techniques and fixation options in ligament reconstruction procedures. Achilles tendons distributed by Hospital Innovations are sterilised **without the use of irradiation** through the patented BioCleanse<sup>®</sup> Tissue Sterilisation Process, which inactivates or removes potential pathogens while maintaining the tissue's biomechanical properties.

## Achilles Tendon Options:

**Pre-shaped**

**Pre-trimmed**

**Conventional**

## Achilles Tendon Benefits

- Allows for multiple fixation techniques
- Minimises operating time and simplifies surgical technique as compared to autograft
- Eliminates donor site morbidity
- Multiple bone block options allow the surgeon to shape the graft into desired form and size at time of surgery

### Pre-shaped Benefits

- Natural calcaneus bone block allows for multiple fixation types
- Pre-shaping of the bone block decreases theatre time

### Pre-trimmed Benefits

- Natural calcaneus bone block allows for multiple fixation types
- Larger pre-trimmed bone block provides flexibility for the surgeon to shape the bone to best fit the patient
- Excellent option for both primary and revision applications

### Conventional Benefits

- Natural calcaneus bone block allows for multiple fixation options
- Provides the largest bone block possible for use in various ligament reconstruction procedures (e.g. primary, revision, PCL, etc.)

## Ordering Information:

Code:	Description:
AL10500	BioCleanse® Achilles Tendon: Conventional with Bone Block
AL10505	BioCleanse® Achilles Tendon: Pre- shaped with 10mm Bone Block
AL10506	BioCleanse® Achilles Tendon: Pre-shaped with 11mm Bone Block
AL10510	BioCleanse® Achilles Tendon: Hemi
AL10515	BioCleanse® Achilles Tendon: Pre-trimmed
